

FOR IMMEDIATE RELEASE

PROJECT 313 SET FOR WORLD PREMIERE AT THE 2026 PEACHTREE VILLAGE INTERNATIONAL FILM FESTIVAL

Best Feature Film Winner at the 20th Annual PVIFF Secures Distribution Through Silver Line Entertainment

ATLANTA, GA — JawJab Productions proudly announces the world premiere of Project 313, a gripping Detroit-set drama written and directed by Jay Anthony White. The film will screen during the 2026 Peachtree Village International Film Festival (PVIFF) on Friday, November 6, at 8:00 p.m. at the Tara Theatre in Atlanta.

The premiere marks a major milestone for the independent feature, which has secured distribution through Silver Line Entertainment. Details regarding the film's wider release will be announced soon.

Project 313 follows five people from vastly different walks of life whose lives become inextricably connected in the turbulent aftermath of the shooting of an unarmed teenager. Set against the rapidly changing landscape of Detroit, the film examines race, policing, gentrification, grief and the difficult search for justice, revealing the humanity behind every headline.

The premiere also represents a triumphant return to PVIFF for Project 313, which was named Best Feature Film at the 20th Annual Peachtree Village International Film Festival last year. Following that honor, the film has been invited back for a special PVIFF Encore presentation.

The ensemble cast includes Duwan Anderson, Jared Withrow, Big Herk, London Scott, Marcus Woods and Moe Millionz, among others. The film is produced by Paris Jones, Anthony Cuffie and Jay Anthony White under the JawJab Productions banner.

Blending crime, drama and timely social commentary, Project 313 offers an unflinching yet deeply human portrait of a city and a group of people forced to confront the consequences of one devastating event.
